

## DAY 3 CW 1

```
import React, { useState } from 'react';

const ToggleMessage = () => {
  const [showMessage, setShowMessage] = useState(false);
  const [storedMessage, setStoredMessage] = useState('');

  const handleStoreMessage = () => {
    const messageToStore = 'Show message';
    setStoredMessage(messageToStore);
    setShowMessage(true);
  };

  const handleToggleMessage = () => {
    setShowMessage(!showMessage);
  };

  return (
    <div>
      <button onClick={handleStoreMessage}>Show message</button>

      {showMessage && (
        <div>
          <button onClick={handleToggleMessage}>
            {showMessage ? 'Hide component' : 'Show Component'}
          </button>
          <p>{storedMessage}</p>
        </div>
      )}

      {showMessage && <p>Hi how are you?</p>}
    </div>
  );
};

export default ToggleMessage;
```

## DAY 3 PAH

```
import React, { useState } from 'react';
const App = () => {
  const [isActive, setIsActive] = useState(false);

  const toggleMode = () => {
    setIsActive(!isActive);
  };

  return (
    <div className={`app-container ${isActive ? 'active' : 'normal'}`}>
      <h1>{isActive ? 'Kaioken' : 'SuperSaiyan'}</h1>
      <button onClick={toggleMode}>goku changes to</button>
    </div>
  );
};
export default App;
```

# Kaioken

goku changes to
